The Company ALCUTEC

ALCUTEC supplies whole plants, plant components and engineering for the metallurgic industry. The company's major activities are concentrated on the aluminum industry which can select equipment from ALCUTEC's delivery program. This program forms the core of the facilities designed and supplied by ALCUTEC, while the company's engineering services are focused on retrofitting plants as well as on complementary and modernization projects. The product range as a whole will thus secure the success of any measures planned.
